Subject Index

abdominal skinfold, preterm infants, subscapular skinfold, triceps skinfold, 177
alpha-2-macroglobulin, fetal growth restriction, birth weight, 201
ammonia production, fetal metabolism, uteroplacental metabolism, umbilical artery, umbilical vein, fetus, human, 1
amniocytes, in situ hybridization, chorionic villi, probes, 101
antenatal, fetus, gastrointestinal motility, gastric emptying, 109
anthropometric measurements, human fetus, reference values, fetal biometric parameters, perinatal autopsy, 45
appropriate-for-gestational-age, cerebellar vermis, small-for-gestational-age, ultrasonography, 9
auditory, premature fetus, sound stimulation, fetal heart rate, 207
autonomic control, heart rate variability, skin blood flow, newborn infant, 133

behavioural states, human fetus, stimulation, 21
birth weight, alpha-2-macroglobulin, fetal growth restriction, 201
birth weight, fetal growth, growth retardation, gestational age, fetal and neonatal mortality, 29
blood pressure, extreme prematurity, 217
body composition, small-for-gestational-age infants, preterm infants, growth, 117

cerebellar vermis, appropriate-for-gestational-age, small-for-gestational-age, ultrasonography, 9
chorionic villi, in situ hybridization, amniocytes, probes, 101
clinical state, VLBW infants, plasma ACTH and cortisol, postnatal dexamethasone, 191
dentritic branching, growth, development of motor pyramids, environmental deterioration, undernutrition, rat, 145
development of motor pyramids, growth, dentritic branching, environmental deterioration, undernutrition, rat, 145
Doppler velocimetry, perinatal mortality, morbidity, 61

Doppler, fetus, renal blood flow, fetal behaviour, 183

environmental deterioration, growth, dentritic branching, development of motor pyramids, undernutrition, rat, 145
extreme prematurity, blood pressure, 217

fetal and neonatal mortality, fetal growth, growth retardation, gestational age, birth weight, 29
fetal behaviour, Doppler, fetus, renal blood flow, 183
fetal biometric parameters, human fetus, reference values, anthropometric measurements, perinatal autopsy, 45
fetal growth restriction, alpha-2-macroglobulin, birth weight, 201
fetal growth, growth retardation, gestational age, birth weight, fetal and neonatal mortality, 29
fetal heart rate, premature fetus, auditory, sound stimulation, 207
fetal metabolism, ammonia production, uteroplacental metabolism, umbilical artery, umbilical vein, fetus, human, 1
fetal testis, Müllerian inhibiting substance, prenatal diagnosis, XX male, 91
fetus, ammonia production, fetal metabolism, uteroplacental metabolism, umbilical artery, umbilical vein, human, 1
fetus, antenatal, gastrointestinal motility, gastric emptying, 109
fetus, Doppler, renal blood flow, fetal behaviour, 183

gastric emptying, antenatal, fetus, gastrointestinal motility, 109
gastrointestinal motility, antenatal, fetus, gastric emptying, 109
gestational age, fetal growth, growth retardation, birth weight, fetal and neonatal mortality, 29
growth retardation, fetal growth, gestational age, birth weight, fetal and neonatal mortality, 29
growth, dentritic branching, development of motor pyramids, environmental deterioration, undernutrition, rat, 145
growth, small-for-gestational-age infants, preterm infants, body composition, 117

heart rate variability, skin blood flow, newborn infant, autonomic control, 133
human fetus, behavioural states, stimulation, 21

human fetus, reference values, anthropometric measurements, fetal biometric parameters, perinatal autopsy, 45
human, ammonia production, fetal metabolism, uteroplacental metabolism, umbilical artery, umbilical vein, fetus, 1

in situ hybridization, amniocytes, chorionic villi, probes, 101

low birthweight, tooth size, 81

minor neurological dysfunction, puberty, perinatal, neonatal neurological abnormality, 71
morbidity, Doppler velocimetry, perinatal mortality, 61
Müllerian inhibiting substance, prenatal diagnosis, XX male, fetal testis, 91

neonatal neurological abnormality, minor neurological dysfunction, puberty, perinatal, 71
newborn infant, heart rate variability, skin blood flow, autonomic control, 133
newborn, pulmonary hypertension, persistent, 163

perinatal autopsy, human fetus, reference values, anthropometric measurements, fetal biometric parameters, 45
perinatal mortality, Doppler velocimetry, morbidity, 61
perinatal, minor neurological dysfunction, puberty, neonatal neurological abnormality, 71
persistent, pulmonary hypertension, newborn, 163
plasma ACTH and cortisol, VLBW infants, clinical state, postnatal dexamethasone, 191
postnatal dexamethasone, VLBW infants, plasma ACTH and cortisol, clinical state, 191
premature fetus, auditory, sound stimulation, fetal heart rate, 207
prenatal diagnosis, Müllerian inhibiting substance, XX male, fetal testis, 91
preterm infants, small-for-gestational-age infants, body composition, growth, 117
preterm infants, subscapular skinfold, triceps skinfold, abdominal skinfold, 177
probes, in situ hybridization, amniocytes, chorionic villi, 101
puberty, minor neurological dysfunction, perinatal, neonatal neurological abnormality, 71
pulmonary hypertension, persistent, newborn, 163

rat, growth, dentritic branching, development of motor pyramids, environmental deterioration, undernutrition, 145
reference values, human fetus, anthropometric measurements, fetal biometric parameters, perinatal autopsy, 45
renal blood flow, Doppler, fetus, fetal behaviour, 183

skin blood flow, heart rate variability, newborn infant, autonomic control, 133
small-for-gestational-age infants, preterm infants, body composition, growth, 117
small-for-gestational-age, cerebellar vermis, appropriate-for-gestational-age, ultrasonography, 9
sound stimulation, premature fetus, auditory, fetal heart rate, 207
stimulation, human fetus, behavioural states, 21
subscapular skinfold, preterm infants, triceps skinfold, abdominal skinfold, 177
tooth size, low birthweight, 81

triceps skinfold, preterm infants, subscapular skinfold, abdominal skinfold, 177

ultrasonography, cerebellar vermis, appropriate-for-gestational-age, small-for-gestational-age, 9
umbilical artery, ammonia production, fetal metabolism, uteroplacental metabolism, umbilical vein, fetus, human, 1
umbilical vein, ammonia production, fetal metabolism, uteroplacental metabolism, umbilical artery, fetus, human, 1
undernutrition, growth, dentritic branching, development of motor pyramids, environmental deterioration, rat, 145
uteroplacental metabolism, ammonia production, fetal metabolism, umbilical artery, umbilical vein, fetus, human, 1

VLBW infants, plasma ACTH and cortisol, clinical state, postnatal dexamethasone, 191

XX male, Müllerian inhibiting substance, prenatal diagnosis, fetal testis, 91
